Example for tablefootnote

This example demonstrates the use of package
tablefootnote, v1.1c as of 2014/01/26 (HMM).
There were no options used. (The package provides no options.)

The `tablefootnote-example.tex` needs to be compiled at least twice to get the references right!

If the etoolbox-package is found, it is automatically used.

For more details please see the documentation!

Save per page about $200\,\text{ml}$ water, $2\,\text{g}$ CO_2 and $2\,\text{g}$ wood:
Therefore please print only if this is really necessary.

Here is some text.[1]

Tables 1, 2, 3 and 5 show normal tables, table 4 depicts a sidewaystable. Table 5 uses the float specifier `H` from the float package.

`Hyperref` option `pdfview=FitH` and `FitBH` do not work due to a bug in pdfTeX, computing wrong anchor coordinates (HEIKO OBERDIEK, 29. October 2011). Depending on used pdf-viewer, hyperlinks in sidewaystables lead e. g. at the end of the document, not at the footnote. `pdfview=Fit`, `FitV`, `FitR`, `FitB`, `FitBV` work, print is OK for all those options.

List of Tables

---

[1] And this is a text footnote.

Another[†]　text[‡]　in a table[§]

Table 1: A table with footnote-symbol-footnotes.

`\renewcommand{\thefootnote}{\fnsymbol{footnote}}` causes footnote-symbol-footnotes, which are possible (see Table 1).

Some text.[¶]

`\renewcommand{\thefootnote}{\arabic{footnote}}` switches back to normal footnote numbers again.

[†] A table footnote.
[‡] Another table footnote.
[§] A third table footnote.
[¶] A text footnote.

Some[6] text[99] in a table[7]

Table 2: A normal table.

Some text.[8]

---

[6] A table footnote.

[99] A table footnote with custom footnote number.

[7] A third table footnote.

[8] Another text footnote.

Another[10]	text[11]	in a table[12]

Table 3: Another table (third one)

More text.[9]

Please note that Table 3 floated to the top of the page. While the footnotes are set and (when hyperref is used) hyperlinked, they are not automatically adapted. Thus either do not use a footnote at the same page before the table, or place the table in "here" or "bottom" position. `\clear(double)page`, `h(!)`, `H` from the `float` package, or `\FloatBarrier` from the `picins` package might help, too. (Or move the table in the source code near the position where it floats to or use the optional footnote marks.)

Table 5 (page 6) uses float specifier `H` from the float package and does not float.

Some text.[13]

---

[9] And yet another text footnote.

[10] A 3rd table footnote.

[11] Another 3rd table footnote.

[12] A 3rd third table footnote.

[13] This is just another text footnote.

Text[14]   in a[98]   sidewaystable[15]

Table 4: A table in the `sideways` environment

---

[14] Please rotate the view for testing the hyperlinks.

[98] Another sidewaystable footnote with optional footnote mark.

[15] Sidewaystable-environment provided by `http://www.ctan.org/pkg/rotating` package.

5

A last table, here with float specifier `H` from the float[16] package.

Another[17]   text[18]   in a table[19]

Table 5: A very last table

Some text.[20]

---

[16] http://www.ctan.org/pkg/float
[17] A 5th table footnote.
[18] Another 5th table footnote.
[19] A 5th third table footnote.
[20] This is just another text footnote.

End of the example for the tablefootnote[21] package.
